Contents

Hot workability of stainless steels : influence of deformation parameters, microstructural components, and restoration processes B. Ahlblom and R. Sandström	1
Defect detection and sizing in metals using ultrasound M. G. Silk	28
Ladle injection metallurgy L. E. K. Holappa	53
Heat treatment of complex aluminium bronzes P. Brezina	77
Annealing of defects produced by neutron irradiation C. J. McHargue	121
Properties and applications of metal hydrides in energy conversion systems H. Wenzl	140
Phase equilibria in iron ternary alloys 7: Critical evaluation of constitution of aluminium-cobalt-iron system G. V. Raynor and V. G. Rivlin	169
Rapid solidification R. Mehrabian	185
Structure and growth of thin films R. W. Vook	209
Volume effects in solid solutions R. B. McLellan	247
Precious-metal dental casting alloys R. M. German	260
Phase equilibria in iron ternary alloys 8: Critical evaluation of constitution of iron-silicon-vanadium system G. V. Raynor and V. G. Rivlin	289
Role and control of texture in deep-drawing steels Sanak Mishra and C. Därmann	307
Corrosion resistance of austenitic Fe-Cr-Ni-Mo-alloys in marine environments A. J. Sedriks	321

The Charles Hatchett Award

Description of Award

The Award, for travel to Brazil (and possibly for travel to Europe for a prize winner from Latin America) with maintenance for approximately two weeks, is administered by The Metals Society and is granted annually from funds provided by the Companhia Brasileira de Metalurgia e Mineração (CBMM) to individuals who, in the judgment of a panel of experts, publish papers of outstanding merit within the following range of subjects:

- (i) the extractive metallurgy of niobium
- (ii) the physical and applied metallurgy of steels and alloys containing niobium either alone or in combination with other metals
- (iii) the fabrication and application of structures and components made from such steels and alloys.

Constitution

An International Consultative Panel of not less than six and not more than eight members, who are required to be individuals of knowledge and standing in the metallurgical science, production, and use of niobium, selects the prize-winning paper.

The Panel is appointed by The Metals Society in consultation with CBMM for a period of three years, the Council of The Metals Society having the right to reappoint members once in consultation with CBMM.

The following are the present members of the Panel:

Dr S. R. Keown (University of Sheffield, Sheffield)
(Coordinator of the Panel and Consultant)

Dr H. Gondoh (Nippon Steel Corporation, Sagamihara City)

Dr A. C. Greday (Centre de Recherches Métallurgique, Liège)

Dr P. R. Krahe (Paulo Abib Engenharia S/A, Rio de Janeiro)

Dr L. Meyer (Thyssen AG, Duisberg)

Professor W. S. Owen (Massachusetts Institute of Technology)

Dr F. P. Pickering (Sheffield City Polytechnic, Sheffield)

Mr R. B. Wood (The Metals Society, London)
(Secretary of the Panel)

Metals Society PUBLICATIONS

provide comprehensive
coverage of the science and
technology of metals, alloys
and allied materials.

Journals Recognised as leaders in their field, Metals Society Journals are widely read in industrial, academic and research organisations in the UK and over 80 other countries.

Ironmaking and Steelmaking (alternate monthly)

Provides international coverage of all aspects of iron- and steelmaking with emphasis on the translation of ideas into effective operational techniques. The journal is aimed particularly at the practising manager directly or indirectly associated with the relevant manufacturing processes.

Members UK £28.00 Overseas US\$60.00*

Non-members UK £55.00 Overseas US\$138.00

(*Members of ISS-AIME and ASM may also subscribe at this rate)

Steel in the USSR (monthly)

Selected papers translated from the Russian journals *Stal'* and *Izvestiya VUZ Chernaya Metallurgiya*, providing a comprehensive picture of current Soviet metallurgical developments.

Members UK £110.00 Overseas US\$242.00 Non-members UK £139.00 Overseas US\$363.00

Metals Technology (monthly)

Concerned with applied metallurgy and metals technology as they affect industrial metals, alloys and allied materials. Records scientific and technical advances, practical experience and future trends in the production, fabrication, application and engineering performance of metallic materials and in the engineering, design and development of related processes and plant.

Members UK £38.00 Overseas US\$85.00 Non-members UK £85.00 Overseas US\$211.00

Metal Science (monthly)

Covers chemical, physical and mechanical metallurgy, including ferrous and non-ferrous metals.

Members UK £38.00 Overseas US\$85.00 Non-members UK £88.00 Overseas US\$218.00

British Corrosion Journal (quarterly)

Concerned with metallurgical, chemical, electrochemical, and physical theory and practice as they affect corrosion and its prevention.

Members UK £28.00 Overseas US\$60.00 Non-members UK £44.00 Overseas US\$109.00

Powder Metallurgy (quarterly)

The only journal of its kind in the UK dealing on an international basis with all aspects of the science and practice of powder metallurgy, including the plant and equipment involved. Includes original papers, the proceedings of conferences organised by The Metals Society's Powder Metallurgy Committee, and news of forthcoming meetings and progress in the PM industry.

Members UK £28.00 Overseas US\$60.00 Non-members UK £44.00 Overseas US\$109.00

International Metals Reviews (alternate monthly)

Published jointly with the American Society for Metals. Presents critical reviews of the published literature on specific topics together with progress reports of recent advances over wider fields of metallurgy.

Members UK £38.00 Overseas US\$85.00
Non-members UK £55.00 Overseas US\$138.00

Metals Society World (monthly)

The membership journal of The Metals Society. Covers the activities of the Society and the international metals community, and provides a forum for members' views.

Available only to Members as part of their annual subscription of £20.00 or US\$50. (Reduced rates for those under 30.)

Recent Book Titles

Continuous Casting: 4th International Iron & Steel Congress (1982)

297 x 210mm 606pp ISBN 0 904357 47 3 Limp Cover
Proceedings of the 4th IISC, London, May 1982. Papers review the present state of continuous casting and its future development and discuss metal preparation, engineering, the operation of billet, bloom and slab casters control and instrumentation and refractories.

PRICE: UK £22.50 Overseas US\$65.00

Developments in Metallurgical Control in Basic Oxygen Steelmaking (1982)

278 x 218mm 100pp ISBN 0 904357 49 X Limp Cover
Fifteen papers presented at the Sidney Gilchrist Thomas Centenary Conference in 1979. Topics include charge and melt composition and control, slag removal and control, ladle treatments, the increased use of scrap and the developments in taphole maintenance. Reprinted from "Ironmaking & Steelmaking".

PRICE: UK £15.00 Overseas US\$45.00

Mechanical Behaviour and Nuclear Applications of Stainless Steel at Elevated Temperatures (1982)

297 x 210mm 264pp ISBN 0 904357 41 4 Casebound
Papers presented at an International Conference held in Italy, 1981. Subjects include physical metallurgy, elevated temperature properties (including irradiation effects), property requirements for design, constitutive equations and deformation maps and the design and performance of components and structures.

PRICE: UK £40.00 Overseas US\$100.00

Towards Improved Performance of Tool Materials (1982)

297 x 210mm 262pp ISBN 0 904357 29 2 Casebound
Proceedings of the joint NPL/Metals Society Conference TIPTOM '81. Papers cover the performance of tool materials, their manufacture and development, heat treatment processes and tests for predicting performance. Current innovations such as rapid solidification techniques, multilayered coatings and the use of synthetic diamonds and ceramics such as sialons are also outlined.

PRICE: UK £40.00 Overseas US\$100.00

Ion-Assisted Surface Treatments, Techniques and Processes (1982)

300 x 210 mm 140 pp ISBN 0 904357 48 1 Paperback
Twenty-two papers presented in September 1982 at an international Metals Society/Welding Institute Conference, covering: ion plating including CrN, Al and TiN coatings; ion implantation and ion beam mixing; sputter coating techniques and applications; and plasma assisted chemical vapour deposition.

Price: UK £18.00 Overseas US\$54.00

Titles in preparation . . .

- **Advances in the physical metallurgy and applications of steels**
- **Clean steel**
- **Heat treatment '81**
- **Solidification technology in the foundry and casthouse**
- **Steels for line pipe and pipeline fittings**
- **Directionally Solidified Materials for High Temperature Service – Malcolm McLean**

Members of The Metals Society are entitled to a discount of 20% on the book prices quoted above.
